

School Based Asthma Therapy (SBAT) Overview

OUR GOALS:

Improve asthma control.

Keep students healthy,
active, and in school.

OUR RESULTS:

Less missed
school days

Less Emergency
Department visits

Less inpatient
hospital stays

HOW IT WORKS:

- We team up with your child's school staff, asthma provider and family.
- SBAT students receive controller inhalers at school on school days.
- It's free to families.
- We've helped more than 1,000 Columbus-area students with their asthma.

If your child is referred by a doctor or nurse to the SBAT program, you will receive a phone call from the SBAT staff with more information.
